Call-in Conversation

Test plot research at Ohio State

Soil Balancing: What Do the Numbers Say About its Effects on Soils, Crops, Weeds, and Farms?

Description: Everyone uses numbers to make decisions, although the numbers people have and the ways they use them often differ. These differences can spell both excitement and challenge when trying to understand and use Soil Balancing. Join us to discuss Soil Balancing by the numbers, as farmers, consultants, and researchers discuss the numbers we have and the numbers we wish we had.

Contact information: Matthew Kleinhenz | kleinhenz.1@osu.edu | 330-263-3810

Additional conference call-in events planned for November 14 and December 12.
